

Lead Data Scientist

Lyon

PhD in Data Science, expert in time series analysis and image data. Experienced in applying machine learning to industrial optimisation, and with a passion for research and teaching to inspire enthusiasm for data and engineering efficiency.

Technical (highly proficient)

- Python, Matlab, C++, R
- TensorFlow, PyTorch
- Time Series, Optimisation, Image (OpenCV)
- Git, Docker, Relational Databases

Languages

- English, French (native)
- Spanish, German (B2/1)

Education

PhD Data Science, INSA/INRAE, Viewpoint, Lyon	2020–2023
MSc Engineering, Ecole Centrale Lyon, Applied Mathematics, 14.9/20	2018–2019
MSc Mechanical Engineering, Imperial College London, 1st Class honours	2015–2019

Experience

Lead Data Scientist, Viewpoint 02/2024-05/2025.

Direction of data science and R&D initiatives for our environmental water monitoring services, combining advanced ML analytics and operational management:

- **Algorithm and Model Development** - Adapting PhD research in time series classification and image tracking to real-time monitoring, based on multivariate functional clustering, decision trees and neural network encoders.
- **AI and MLops** - Continued development of ML for time series, pattern recognition, and image tracking. Implementation of onboard systems (C++, SQL, Zigbee, MQTT), Scaleway cloud computing, and Python-based ML pipelines (TensorFlow). Established monitoring visualizations (Grafana) and alerting workflows.
- **Team Leadership and Tech Stack** - Directing the team of 2 data scientists in algorithm development, versioning (Git), and client interactions. Oversaw 2 masters internships focusing on onboard videotracking (ARTrack, [VOT challenge](#)), ensuring data integration (FastAPI, Docker), and operational deployment.
- **Research partnership** - Pivotal in the Viewpoint/INRAE laboratory partnership, advancing toxicity testing and videotracking technology for behavioural monitoring, and continued journal writing and conference talks.
- **Global Biomonitoring Expansion** - Oversight of international expansion, starting overseas market and network exploration in the USA (served as a chair with EPA experts at SETAC for advanced monitoring) and China, and initiating European industrial partnerships in Switzerland.
- **Project proposals (Data and SDGs)** - Co-wrote (with CEO) grant proposals representing 15% of company turnover for 2025/6 in international research calls, through Water Europe and ADEME (around 1M€ 2024).

PhD - Time Series Data, Viewpoint and INRAE/INSA 2020–2023

- **Tech** - Developed statistics and machine learning / neural net models (Python, R) for time-series clustering and multivariate functional data, integrating some for real-time monitoring with Viewpoint's development team.
- **Project Management** - Managed operational aspects of the PhD, including data collection, paper writing, and presenting at 8 international conferences. Published as first author in [Water Research](#) and Science & Technology.

Python Course Developer and Teacher, TechCamp techcamp.org.uk 2018 & 2020
Authored, developed and tutored code for remote Python learning through PyGame and artificial intelligence.

Data Science Internship, Naldeo Technologies 2019
Responsible for the conception and early development of naldeo industrial metrics ([NIM](#)) in predictive maintenance.

Personal Data and Volunteering Projects

- Developed a deep learning model for classifying shark eggs images for [SharkTrust](#), based on [CCT architecture](#) using tensorflow, and integrated the model into their app with flask, alongside two university colleagues (2024).
- Active [DataforGood](#) contributor and [Lyon Data Science](#) member.
- Provided technical and email operations for Mediacontacts PR (family business).
- Teaching two 30-h modules in Python and statistics to masters students (M2) at INSA and Lyon 3 (2024).
- Public Talks - Presentation of accessible AI topics, including a general public talk at the [Greener Good festival](#) (10/2024) on the intersection of climate change and AI, titled "AI and sustainability - Friend or Foe?".
